A MUSIC EXPERIENCE
**FAR BEYOND
THE NORMAL**

Over 10 YEARS of Superior Sound Engineering

Since Venom was established in 1998, we have developed and produced in-car speakers for audio lover, sound lover and music lovers. Over the years, we have won numerous awards for our speaker systems, and we have been very successful in sound-off championships. Fundamental to our success is a passion for music reproduction shared by all the directors of the company. This provides the drive to develop the perfect speaker system.

From the start, we have let our ears be the judge, as after all, they will be the only instruments assessing the performance of the speaker system in its final environment. Music is a subjective science. Measuring instruments are useful to a point, but they can also impose limits. Our ears are needed to take the development further. We are not afraid to venture into the unknown during development - no idea is too strange for us to experiment with in the search for the perfect sound.

PANDORA

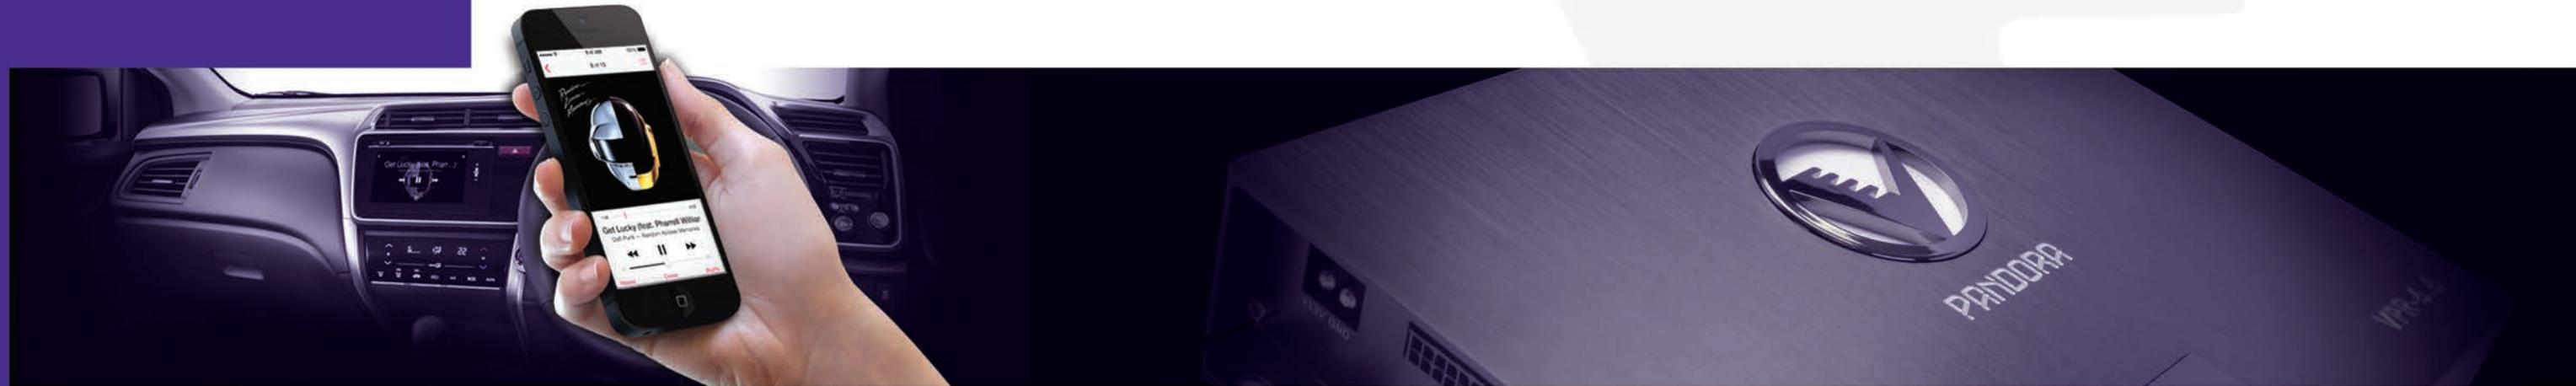

In accordance with the meaning of her name, Pandora is a magic box that can absorb all the diseases in the vehicle which was born in the form of Digital Sound Processing.

Born from Venom Fighter team to help us to achieve a satisfaction in the world of real car audio system. Pandora VPR 1 alone embrace the latest technology and best to fix some errors from the acoustical from the vehicle. With DAC 32bit/96khz, VPR-1 maximize your Venom audio device in your vehicle.

PANDORA FEATURES

EXCELLENCE THAT BRINGS
ANALOG AUDIO SYSTEM TO **DIGITAL ERA**

The X-over form which fits your driver capability makes the work of your driver character becomes more maximal. An active X-over digital feature makes system advanced tuning.

To satisfy the variety of music tastes, VPR 6.6 provides 31 band semi parametric equalizer feature which makes us possible to adjust the sound according to your specific preferences.

**BLUETOOTH CONNECTION FOR
UNLIMITED MUSIC ENTERTAINMENT**

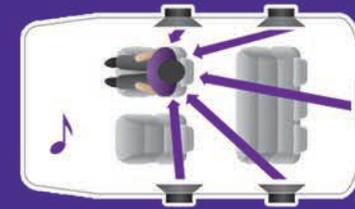

Music transferring can be operated by Bluetooth feature in your favorite Android or IOS Hand phone. With technology which is developed at Venom Lab, play your favorite songs through Hand Phone without reducing its sound quality is possible. This advance technology makes Pandora become excellent among

TIME ALIGNMENT

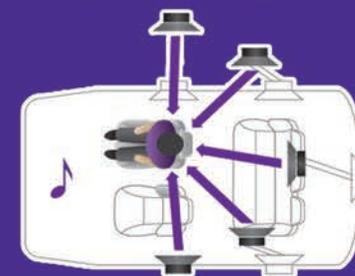

BRING TECHNOLOGY OF DIGITAL SOUND PROCESSOR TO YOUR CAR AUDIO

Besides providing with so many product features, which can upgrade your car audio performance, VPR 6.6 is also supported with **Time Alignment** technology which can be functioned to create space conception in your car. It is intended for providing a clearer sound, so everyone can hear distinctly each music instrumentals separately in a more detail sound. Moreover, Time Alignment feature, VPR 6.6 brings you to experience music into a higher level by conducting **Live Performance** into your Car.

WITHOUT TIME ALIGNMENT

Sound which is produced without Time Alignment will sound jumble because some of the music instruments will seem far and hamper, so it cannot be heard clearly by your hearing. This inconvenient always happens when we hear music with standard sound system in our car.

WITH TIME ALIGNMENT

By activating Time Alignment Feature in your car, all music instrument that you hear will sound organized as it is in a Live Performance. Instrument chord which sound too hard because of you are not in apposite seat will be organized with this processor, so your seat choice mistake will be excused because of this equipment, as it will produce the sound as if you are in live performance with the best seat place.

PANDORA PLUG & PLAY SYSTEM INSTALLATION

The installation process is very quick and easy. This is because, Venom uses "PLUG AND PLAY" wiring cable which does not need any wires cutting. Moreover, it is supported with small dimension that makes Venom is simple to be applied in your car. The fastest installation that can be done is 30 minutes (exclude tuning).

WITHOUT CHANGING HEAD UNIT

This product can reach its optimum function when it is played with Head Unit that you may use.

REMOTE STIR FUNCTION STILL CAN BE OPERATED

This product will not disturb the inconvenience of your car system

CAN BE MOVED TO OTHER CARS

Only with changing its OEM set cable, Pandora VPR 6.6 can be replaced to other cars conveniently.

SPECIFICATION DETAILS OF PRODUCT:

6 Channel DSP With Power Amplifier

Signal Input :

- 4 Channel High level Input
- 6 Channel Low Level input
- Automatic Matching of high level input impedance
- 5.0 lossless Bluetooth input
- Digital optical input
- Original car wiring harness docking
- Controller VPR 1.4 CT (Optional)
- Controller VHR 2 (Optional)

Signal Output :

- High power output 4x40W/4 Ohm
- 6 Channel Low Level input
- 6 Channel Independent level
- 31 band EQ, Slope, Cut, Delay

PANDORA VPR 3.6

SPECIFICATION DETAILS OF PRODUCT:

6 Channel DSP With Power Amplifier

Signal Input :

- 4 Channel High level Input
- 6 Channel Low Level input
- Automatic Matching of high level input impedance
- 5.0 lossless Bluetooth input
- Digital optical input
- Original car wiring harness docking
- Controller VPR 1.3 CT (Optional)
- Controller VHR 2 + VHR 2 MU (Optional)
- Auto Tuning

Signal Output :

- High power output 4x40W/4 Ohm
- 6 Channel Low Level input
- 6 Channel Independent level
- 31 band EQ, Slope, Cut, Delay

PANDORA VPR 4.6 MKIII HD

SPECIFICATION DETAILS OF PRODUCT:

8 Channel DSP With Power Amplifier

Signal Input :

- 8 Channel High/Low Level Input
- Smart APTX HD 5.2 Lossless Bluetooth Input
- Automatic matching of high level input resistance
- Digital Optical input
- Controller VPR 1.4 CT (Optional)
- Controller VHR 2 (Optional)

Signal Output :

- Power output 4x60W + 2x100W
- 6 Channel low level input
- 8 channel independent level
- 32 Band EQ, Slope, Cut Delay
